# What Do You Know About Blockchain?

## Blockchain Technology

Blockchain technology is an advanced database mechanism that allows transparent information sharing within a business network. A blockchain database stores data in blocks that are linked together in a chain. The data is chronologically consistent because you cannot delete or modify the chain without consensus from the network. As a result, you can use blockchain technology to create an unalterable or immutable ledger for tracking orders, payments, accounts, and other transactions. The system has built-in mechanisms that prevent unauthorized transaction entries and create consistency in the shared view of these transactions.

## Features

1. Immutability
2. Better Security
3. Affordability
4. Minting
5. Faster Settlement
6. Transparent/Decentralized

# Metaverse?

Metaverse is a virtual world where billions of people live, work, shop, learn and interact with each other, all from the comfort of their couches in the physical world. In this world, the computer screens we use today to connect to a worldwide web of information have become portals to a 3D virtual realm that's palpable like real life, only bigger and better. Digital facsimiles of ourselves, or avatars, move freely from one experience to another, taking our identities and our money with us.

Polygon  
**MATIC & DAI**  
Stable Coin

01

### **Polygon Matic**

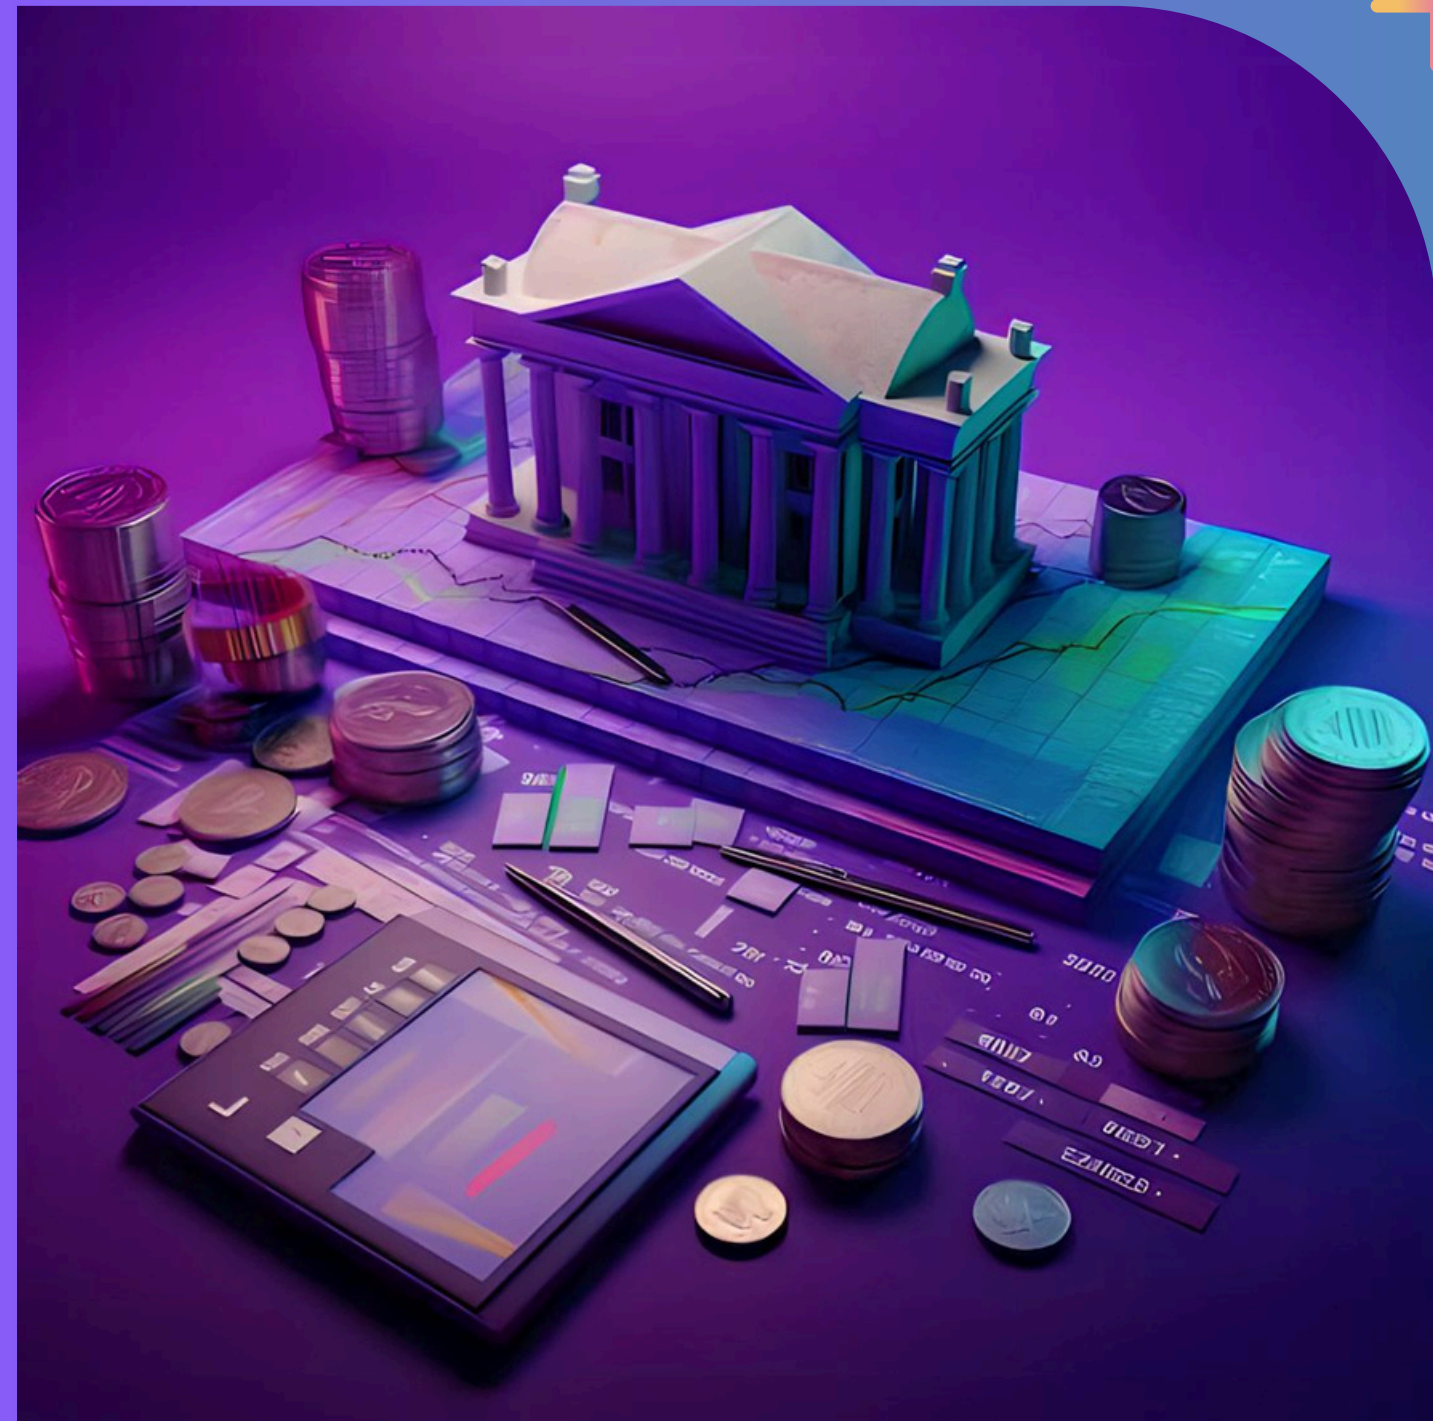

Polygon is a blockchain platform which aims to create a multi-chain blockchain system compatible with Ethereum. As with Ethereum, it uses a proof-of-stake consensus mechanism for processing transactions on-chain. Polygon's native token is named MATIC.

02

### **DAI Stable Coin**

Dai is a stablecoin on the Ethereum blockchain whose value is kept as close to one United States dollar as possible through a system of decentralized participants incentivized by smart contracts to perform maintenance and governance functions. The supply of DAI cannot be altered by any party in the network, which offers complete transparency and security.

# LOYALTY REWARD

## The Loyal Reward

Loyalty reward is for team leader's who are completely loyal. Loyalty rewards are a way to strengthen the team and thereby create a strong community. The additional profit generated in Debank smartcontract is channeled back to the team building leaders. This happens every 90 days. Profit will be transferred every 90 days directly to your wallet without any action. All the transactions are shown in your transaction history. For that we have set 8 pool, Or 8 ranks. Each pool gets 5% to 25% profit. The profit is distributed equally to how many people are there in the rank or pool that you have achieved.

For eg: if are achieved iron rank and also 9 more there. Profit equally shared to the 10 Achivers.

- For the first pool 5%, Then 7% , 10%, 11%, 13%, 14%, 15% & 25%
